

RESPECT

Drivers – Please Treat Bicyclists With Respect!

- Bicyclists are traffic and have the legal right to ride on the road.
- Pay attention to bicyclists and don't drive distracted.
- Pass only when necessary, slow down and give 3 feet of space.
- Let bicyclists clear intersections before making right turns.
- When turning left or entering a roadway, yield right of way to oncoming bicyclists as you would to any driver.

Keeping our roads safe is a **SHARED RESPONSIBILITY**.
Remember, someone you care about rides a bike.
Don't turn your drive into a tragedy.

PLEASE TREAT BICYCLISTS WITH RESPECT.

WE

NY

New York Bicycle coalition (NYBC) is the only statewide organization which advocates for better biking and walking. We've been your voice for a more bicycle-friendly New York State since 1990.

We serve the State of New York and all residents by providing a clear and consistent voice for the interests of people who ride bikes and by promoting the safe use of the bicycle as an important mode of transportation, sport, recreation, health, environmental protection, energy conservation, tourism, and economic development.

We believe that all across the state, our communities need more and better sidewalks, bike lanes and trails. A few miles aren't enough. We need networks that connect us to our daily destinations. We also need policies and laws that protect us while we ride and help to make biking more accessible to everyone. We all deserve safe, enjoyable, and easy-to-access streets and places to ride a bike and walk.

Sponsored by

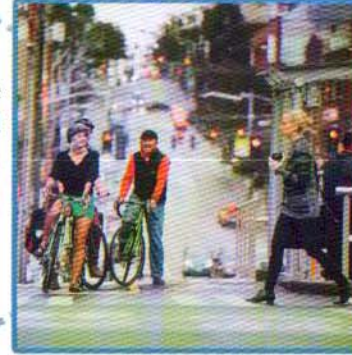

Safety & Education

We work to make communities throughout the state safer for all road users by educating bicyclists and motorists on important laws and realities which exist.

Policy & Advocacy

We advocate for state laws and policies, like a 3 foot safe passing law and increased funding for bike lanes and sidewalks, which make riding a bike and walking safer for all New Yorkers and increase the amount of people who ride a bike and walk.

Tourism & Economic Growth

We work to encourage and increase the economic impact of bicycle tourism through a variety of statewide, regional, and community-based activities like: developing bike maps, advocating for roll-on service on trains, promoting and growing event attendance, and much more.

Enforcement & Protection

We help to improve and increase the statewide enforcement of laws which protect people who ride a bike and walk.
